

JUNYAO (JORDAN) MA

Madison, WI | 608-707-9365 | jordan.analyst.wisc@gmail.com

SUMMARY

Statistics undergraduate with completed internships spanning applied AI, credit-card operations, and energy data. Experienced in translating stakeholder questions into governed metrics, validating high-volume records, and improving recurring workflows with SQL, Snowflake, Power BI, Excel, Python, and R.

EDUCATION

University of Wisconsin-Madison - B.S. Statistics

Expected May 2027

Probability, Linear Algebra, Regression, Time Series, Statistical Computing, Data Visualization, Machine Learning

TECHNICAL SKILLS

SQL; Snowflake; Power BI; Advanced Excel (Power Query, PivotTables, lookups, validation, VBA/macros); Python (pandas, NumPy); R; KPI definition; requirements translation; data-quality auditing; reconciliation; process improvement.

EXPERIENCE

EasySaleCloud Jun 2026 - Aug 2026

Applied AI in Data Intern | Rockville, MD

- Built the analytics layer of an internal Credit Card Portfolio BI Agent for a consumer issuer, converting recurring portfolio and underwriting questions into governed metrics across a 16-table Snowflake warehouse.
- Wrote and validated cross-portfolio SQL for underwriting calibration, adverse selection, and vintage loss curves; cross-checked results in Python against hand-verified baselines.
- Translated recurring questions from risk, finance, and marketing stakeholders into version-controlled KPI definitions, dashboard requirements, and plain-English answer formats.
- Delivered self-service Power BI and agent outputs with metric caveats and consistent portfolio and vintage views, reducing reliance on one-off analyst requests.

Industrial and Commercial Bank of China, New York Branch

May 2025 - Jul 2025

Credit Card Operations Analyst Intern | New York, NY

- Validated and reconciled 2,000+ credit-card applications across physical documents and internal systems, maintaining reported 100% processing accuracy.
- Built and refined Excel billing-cycle tracking across 1,000+ accounts, standardizing recurring checks, return-date monitoring, and follow-up.
- Categorized data exceptions, screened records against internal FICO thresholds, and documented escalation paths, contributing to a reported 15% improvement in early-stage risk flagging.
- Translated operations and loan-team requirements into data-entry rules and QA checks, contributing to a reported 10% faster issuance turnaround.

Qulian Technology

May 2024 - Jul 2024

Data Operations Analyst Intern, Energy Data Focus | Hangzhou, China

- Collected, cleaned, and validated 100,000+ monthly electricity, natural-gas, and coal records from five partner energy companies.
- Performed accuracy, completeness, consistency, validity, and timeliness audits; documented anomalies with logs and screenshots.
- Coordinated root-cause resolution with client data teams within 24-48 hours and enhanced Excel exception reporting, contributing to approximately 5% fewer manual tracking errors.

SELECTED PROJECTS

Global CO2 Emissions & Energy Dashboard 2026

R, Shiny, ggplot2, tidyverse

- Built a reactive 50,411-row R Shiny dashboard with user-controlled metrics, filters, trends, and correlations.

CREDENTIALS & LEADERSHIP
