

JUNYAO (JORDAN) MA

Madison, WI | 608-707-9365 | jordan.analyst.wisc@gmail.com

SUMMARY

Statistics undergraduate with completed BI and data-operations internships across consumer credit, banking, and energy. Built governed metrics, validation workflows, and self-service reporting with Snowflake SQL, Power BI, Python, Excel, and R/Shiny.

EDUCATION

University of Wisconsin-Madison - B.S. Statistics

Expected May 2027

Probability, Linear Algebra, Regression, Time Series, Statistical Computing, Data Visualization, Machine Learning

TECHNICAL SKILLS

Snowflake SQL; Power BI; Advanced Excel (Power Query, PivotTables, lookups, validation, VBA/macros); Python (pandas, NumPy); R (tidyverse, ggplot2, Shiny); data cleaning; reconciliation; KPI governance; dashboard development; reporting workflows.

EXPERIENCE

EasySaleCloud Jun 2026 - Aug 2026

Applied AI in Data Intern | Rockville, MD

- Built the analytics layer of a Credit Card Portfolio BI Agent over 16 Snowflake tables, standardizing recurring portfolio questions into governed metrics and reusable self-service reporting definitions.
- Wrote cross-portfolio Snowflake SQL for underwriting calibration, adverse selection, and vintage loss curves; validated outputs in Python against hand-verified baselines.
- Created version-controlled KPI definitions and caveat reminders so regulated credit metrics were interpreted consistently across reports and agent answers.
- Delivered Power BI dashboards and plain-English self-service outputs, giving risk, finance, and marketing teams consistent portfolio and vintage reporting.

Industrial and Commercial Bank of China, New York Branch

May 2025 - Jul 2025

Credit Card Operations Analyst Intern | New York, NY

- Reconciled 2,000+ application records across source documents and internal systems, translating recurring exceptions into structured validation rules and repeatable QA checks.
- Built and refined Excel tracking for billing-cycle return dates across 1,000+ accounts, standardizing update cadence, return-date checks, and exception follow-up.
- Converted operations and loan-team requirements into data-entry rules and escalation categories, supporting a reported 10% faster issuance turnaround.

Qulian Technology

May 2024 - Jul 2024

Data Operations Analyst Intern, Energy Data Focus | Hangzhou, China

- Cleaned and validated 100,000+ monthly electricity, natural-gas, and coal records from five partners using standardized data-quality checks.
- Audited accuracy, completeness, consistency, validity, and timeliness; logged anomalies and coordinated corrections with client data teams within 24-48 hours.
- Maintained recurring Excel reporting and exception workflows, contributing to approximately 5% fewer manual tracking errors and a more consistent source of truth.

SELECTED PROJECTS

Global CO2 Emissions & Energy Dashboard 2026

R, Shiny, ggplot2, tidyverse

- Built a reactive 50,411-row R Shiny module with user-controlled metrics and filters; removed aggregate rows, distinguished missing values from true zeros, and documented data-availability limits.
