

JUNYAO (JORDAN) MA

Madison, WI | 608-707-9365 | jordan.analyst.wisc@gmail.com

SUMMARY

Statistics undergraduate with experience validating high-volume financial and energy datasets, building Excel tracking workflows, and communicating data-quality findings across technical and business teams. Skilled in Excel, SQL, R, Python, Power BI, and interactive visualization.

EDUCATION

University of Wisconsin–Madison — B.S. Statistics Expected May 2027
Probability, Regression, Time Series, Statistical Computing, Data Visualization, Machine Learning

TECHNICAL SKILLS

Python (pandas, NumPy); R (tidyverse, ggplot2, Shiny); SQL; Power BI; Advanced Excel (PivotTables, Power Query, lookups, validation, VBA/macros); data cleaning, reconciliation, reporting, and dashboard development.

EXPERIENCE

Industrial and Commercial Bank of China, New York Branch May 2025 – Jul 2025
Credit Card Operations Analyst Intern | New York, NY

- Validated 2,000+ credit card applications by reconciling source documents with internal systems and documenting exceptions.
- Built Excel tracking for billing-cycle return dates across 1,000+ accounts, supporting timely statement generation and reducing manual follow-up.
- Partnered with operations and loan teams on workflow improvements that contributed to a reported 10% faster turnaround.

Qulian Technology May 2024 – Jul 2024
Data Operations Analyst Intern, Energy Data Focus | Hangzhou, China

- Cleaned and validated 100,000+ monthly energy records from five partner companies using accuracy, completeness, and consistency checks.
- Investigated anomalies, documented root causes, and coordinated corrections with client data teams within 24–48 hours.
- Enhanced recurring Excel-based reporting pipelines, contributing to an approximately 5% reduction in manual tracking errors.

Alibaba Global Dreamer Program — AI Innovation Track Jul 2024 – Aug 2024
AI Product Developer | China

- Developed an emotional-support chatbot prototype using Alibaba's Tongyi large language model.
- Labeled 500+ emotional-conflict scenarios and translated user needs into conversation flows and evaluation cases.

SELECTED PROJECTS

Global CO2 Emissions & Energy Dashboard 2026
R, Shiny, ggplot2, tidyverse

- Built a reactive bubble-scatter module for a 50,411-row dataset; selectors update filters, labels, trend, and correlation summary.
- Removed aggregate rows, distinguished missing values from zero, and documented metric-specific availability limits.

Brazilian E-Commerce Customer Satisfaction 2026
R, tidyverse, ggplot2, patchwork

- Joined multiple Olist tables and designed a coordinated multi-panel visualization to examine satisfaction-related patterns.

CREDENTIALS & LEADERSHIP

SOA Exam P — Passed | Chinese National First-Level Golf Athlete | AMC 12 Top 15% and AIME Qualifier
