

JUNYAO (JORDAN) MA

Madison, WI | 608-707-9365 | jordan.analyst.wisc@gmail.com

SUMMARY

Statistics undergraduate with experience translating stakeholder needs into structured workflows, validating high-volume financial and operational data, and improving recurring reporting processes. Skilled in Excel, SQL, Power BI, Python, R, data-quality analysis, process documentation, and cross-functional coordination.

EDUCATION

University of Wisconsin-Madison - B.S. Statistics

Expected May 2027

Probability, Regression, Time Series, Statistical Computing, Data Visualization, Machine Learning

TECHNICAL SKILLS

Advanced Excel (PivotTables, Power Query, lookups, validation, VBA/macros); SQL; Power BI; Python (pandas, NumPy); R; requirements translation; data-quality auditing; reconciliation; KPI/reporting support; process documentation.

EXPERIENCE

Industrial and Commercial Bank of China, New York Branch

May 2025 - Jul 2025

Credit Card Operations Analyst Intern | New York, NY

- Validated 2,000+ credit card applications using accuracy, completeness, consistency, and validity checks; documented exceptions across source documents and internal systems.
- Built and refined Excel tracking for billing-cycle return dates across 1,000+ accounts, standardizing recurring checks and reducing manual follow-up.
- Translated operations and loan-team needs into data-entry rules, exception categories, and QA checks; workflow improvements contributed to a reported 10% faster turnaround.

Qulian Technology

May 2024 - Jul 2024

Data Operations Analyst Intern, Energy Data Focus | Hangzhou, China

- Cleaned and validated 100,000+ monthly energy records from five partner companies using recurring data-quality controls.
- Investigated anomalies, documented root causes, and coordinated corrections with client data teams within 24-48 hours.
- Enhanced recurring Excel reporting and exception-tracking workflows, contributing to an approximately 5% reduction in manual tracking errors.

Alibaba Global Dreamer Program - AI Innovation Track

Jul 2024 - Aug 2024

AI Product Developer | China

- Labeled 500+ emotional-conflict scenarios and translated user needs into structured conversation flows and evaluation cases.
- Connected user research, AI capabilities, and iterative product testing in a collaborative development setting.

SELECTED PROJECTS

Brazilian E-Commerce Customer Satisfaction

2026

R, tidyverse, ggplot2, patchwork

- Joined order, review, product, and category tables to examine satisfaction-related patterns and document the unit of analysis.
- Designed a coordinated multi-panel visualization that translated analysis into a clear business-facing narrative.

Global CO2 Emissions & Energy Dashboard

2026

R, Shiny, ggplot2, tidyverse

- Built a reactive dashboard module for a 50,411-row dataset with user-controlled metrics, filters, trend, and correlation summaries.

CREDENTIALS & LEADERSHIP
